FMA Approves Capital Markets Prospectus of Emerald Horizon AG – Listing Application Filed with Vienna Stock Exchange

Planned trading start for SMRX shares on June 26, 2026 – subject to admission by Vienna Stock Exchange.

Graz (AT), 16 June 2026 – Emerald Horizon AG, an Austrian deep-tech company headquartered in Graz, has today reached a significant milestone on its path to a stock exchange listing: the Austrian Financial Market Authority (FMA) has approved the company's capital markets prospectus. Simultaneously, the application for admission of the shares to trading on the Vienna Stock Exchange has been filed. The targeted reference price per share is EUR 760.

Subject to a positive decision by the Vienna Stock Exchange, trading is planned to commence on June 26, 2026. The share will be listed under ISIN AT0000A3UZE1 and is expected to trade under the ticker symbol SMRX, with a reference price of EUR 760 per share.

Under the SMRX brand, Emerald Horizon combines two complementary technology lines: integrated energy storage infrastructure and a new generation of modular small reactors. The hybrid storage system DUALstore PLUS – a combination of battery and thermal storage with AI-assisted control – addresses the already-existing demand for reliable, decentralized energy. In addition to the third-party battery storage solution Estore, CALstore is a core component of DUALstore PLUS. Emerald Horizon is developing CALstore as a molten salt-based thermal storage system.

In parallel, Emerald Horizon is developing ADES, a next-generation thorium-based reactor – with no uranium, no plutonium, and no long-lived transuranic waste. Together, the SMRX portfolio targets scalable, low-carbon baseload energy systems.

With this focus, SMRX aligns with a clear European trend. At the Nuclear Energy Summit in Paris on March 10, 2026, the European Commission presented its strategy for Small Modular Reactors (SMRs) and reaffirmed the goal of making this technology operational in Europe by the early 2030s.

Commission President Ursula von der Leyen captured the underlying rationale: the most efficient energy system combines nuclear power and renewables, supported by storage, flexibility, and grids – precisely the building blocks that Emerald Horizon's SMRX portfolio is designed around.

"Listing on the Vienna Stock Exchange is our commitment to transparency, accountability, and long-term responsibility. But it is also a commitment to Austria and to Europe. This continent needs secure, reliable, and clean energy, and we want SMRX to make a substantial contribution to that. A publicly listed Emerald Horizon AG sends a strong signal to our customers, partners, and shareholders: we are building a company that can withstand the rigorous standards of the capital markets and reliably bring its technology to the world." – Florian Wagner, CEO of Emerald Horizon AG

Emerald Horizon will provide timely updates on the further progress of the admission process in compliance with applicable capital markets regulations.

ABOUT EMERALD HORIZON

Emerald Horizon AG, headquartered in Graz, develops technologies for the decarbonization of energy supply under the SMRX brand – from hybrid energy storage systems to next-generation modular reactors. The company's goal is secure, scalable, and globally deployable baseload energy without the drawbacks of legacy nuclear technology.
